Art Unit: 3712

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite because the requirement of “the or each arm” on line 5 thereof is inconsistent with the requirement of “at least one” on line 2 of the claim. Claim 1 is also indefinite because the phrase “the arrangement being such that” on line 7 thereof appears to indicate that the claim may encompass additional structure that may not have been claimed. Claim 20 is indefinite because the reference to the fulcrum is vague regarding whether a fulcrum is claimed or the fulcrum is recited only as an intended use of the claimed apparatus. Claim 22 is indefinite because the specific arrangement or structure encompassed by the phrase beginning with “the arrangement” on line 4 thereof can not be determined.

3. The claims are objected to because they contain minor typographical errors or misspelled words. See the words “centre” and releaser in claim 1 for example.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3712

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

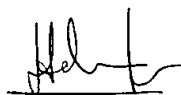

6. Claims 1-23 are rejected under 35 U.S.C. 102(b or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Belden Jr (6,196,384) or Fraser et al (5,788,068, cited by the applicant), or Furutsu (6,041,923). Belden teaches cantilevered arms having multiple hinges or pivot means. For example the first pivot means could be hinge 86 and the second pivot means could be either of hinges 92 or 102 or 124 or 126. Fraser teaches first and second pivot means in the areas of 19 and 21 respectively in fig 10 for example. Furutsu teaches a radial arm (most clearly seen in Fig 3) having a first pivot means on the far left of the figure and a second pivot means at B thereof. It would have been obvious to provide the devices of either reference in the claimed dimensions in order to make them more convenient for storage.
